Students should dress well at school. This is because schools are places where students study. Students shouldn't be dressed fashionably (时尚地) or strangely. That is thought of as impolite behavior at school. So many schools have their own school uniforms. In general, the price is lower than that of common clothes in markets. The colors and styles between boys' and girls' are usually different. And each uniform has the name of the school where the student studies.

However, some schools also allow students to choose other clothes they like. But those who wear other clothes must obey the school rules about clothing at school. The following are rules from Green High School.

- ★ Clothing must cover shoulders (肩) and backs.
- ★ No halter tops (三角背) are allowed.
- ★ Skirts must be long enough to cover girls' knees. Skirt straps (裙带) must be as wide as three fingers.
- ★ Shorts must be at least as long as where your finger tips are when your arms are straight by your side.
- ★ Sleeveless (无袖) shirts are only OK for boys.

- () 49. In general, school uniforms _____.
A. are fashionable and beautiful B. have the school names on them
C. are chosen by students themselves
D. are more expensive than common clothes
- () 50. Which of the clothes are allowed in Green High School?
A. Halter tops for boys. B. Sleeveless blouses for girls.
C. Shirts that can cover shoulders and backs.
B. Skirts whose straps are as wide as two fingers.
- () 51. The passage mainly talks about _____.
A. how to behave well at school B. rules of dressing in schools
C. different school uniforms D. fashionable clothes

C

I'm Jenny. I was moved by a story last summer. When I went to a friend's house as a guest, I found a wooden sign hung on the door. It read, "Before entering, please put down your trouble. When returning, bring back your happiness."

After entering the house, I saw the wife and the husband were both harmonious, two children were friendly and polite and warmth filled the house.

I naturally asked them about the wooden sign. The wife looked at the husband with a smile, "You tell the story." The husband then looked back at the wife, "You say because it was your creativity."

Finally, the wife said softly and slowly, "Once when I got home, I was surprised to see a sleepy and tired face in the elevator (电梯) mirror, with the worried eyes. So I thought when my children and husband faced this worried face, how would they feel? If I also faced such a face, how would I feel? Then I could imagine my children's silence and my husband's indifference (冷淡) at the dinner table. The next day, I wrote a wooden sign and hung it on the door to remind myself. As a result, the sign reminded myself and the whole family. Something surprising happened in this way. Not only our family but also the guests to our house always become happy."

It is true that people with better education are usually able to get better paying jobs. It seems that the purpose of education is to make people get jobs. But this isn't accepted by all people.

Some people may think that a person should spend the best years of his life to get education only for a way of living. This was probably one of the earliest reasons of education. In fact, if education is just a way of making a living, people don't need to spend so much time in school. People can get education for a living in a short time. Subjects like history and geography need not be taught to everyone. Even language and math need not be taught in detail (详细地), either. Here it is clear that education is much more than teaching a man to get a way of living.

Education is well-rounded (全面的) and it is mainly for improving a man. It is not only to teach him to speak, read and write, but also to develop his creative thinking and other abilities. After that, it is to make him a wise man and thankfully enjoy the achievements of human. Education is to make a man lead a better life. Educated people are expected to be able to listen to good music, read good books, watch plays and most importantly, take an interest in the world.

- () 57. People with little education usually _____.
A. can't do well in anything B. have a good chance to get a job
C. spend the best years to choose jobs D. have fewer chances to get a good job
- () 58. The earliest education was probably to _____.
A. make a man lead a better life B. teach a man to write and think
C. make people get a way of living D. teach people to read good books
- () 59. It is expected that educated people will be able to _____.
A. accept education as a way of living B. take an interest in the whole world
C. develop their abilities to make plans D. learn subjects like language and math
- () 60. The passage mainly tells us that _____.
A. education should make a man improve
B. people can get education in a short time
C. people should be able to get better paying jobs
D. all subjects are so important for a way of living

阅读短文,并按要求完成 66~70 题。

Animals in the ocean are getting into great danger because of noise pollution caused by human beings. The noise comes from a number of human activities such as industrial underwater explosions (爆炸). Such noises are added to natural sounds. These sounds include the breaking of ice fields, underwater earthquakes, and sounds made by animals themselves.

Decibels (分贝) measured (测量) in water are different from those measured on land. A noise of 120 decibels on land causes pain to human ears. In water, a decibel level of 195 would have the same effect (影响).

Some scientists have planned to set a noise limit (限度) of 120 decibels in oceans. They have found that noises at that level can do harm to whales.

A team of American and Canadian scientists discovered that louder noises can seriously hurt some animals. The research team found that powerful underwater explosions were causing whales to lose their hearing. This had a serious effect on the whales' ability to exchange information and find their way. Some of the whales even died. The explosions had caused their ears to bleed.

Many researchers whose work depends on ocean sounds disagree to a limit of 120 decibels. They say such a limit would mean an end to important industrial and scientific research. Scientists do not know how much and what kinds of noises are harmful to ocean animals. However, many scientists think that noise is a greater danger than they believed. It's time for them to take action to help ocean animals.
