One possible version:

It is known that the environment is important for human. The results of the school survey show that fifty-two students always join the volunteer jobs to make the city cleaner. Thirty-six students sometimes work as a volunteer. It's a pity to find that twelve percent of them seldom do volunteer jobs.

The environment in which we live is getting worse. I think that the air is no longer fresh, the water isn't clean any more. So we should join the activities to protect the city we live in.

To build a civilized city, we have so many things to do. First, we should plant more trees. Not only can it protect environment, but also it is good for our health. Next, we can save water and don't waste it. Thirdly, we mustn't drop rubbish anywhere. It's great if we can pick up the litter on the ground when you see them. I believe our city will have a great environment in the future.
