China isn't very well-known for its sci-fi films. But a new movie called *The Wandering Earth* has become China's biggest sci-fi hit.

It's based on a short story written by a Chinese sci-fi(科幻小说) writer Liu Cixin. In the film, Earth is in face of being destroyed by the dying sun. So humans around the world work together to move Earth out of the solar(太阳的) system. But it will take 2,500 years to do this.

In most space films, whenever Earth faces a disaster, the solution is always **fleeing** the planet in spaceships. But *The Wandering Earth*, offers a different idea: Earth goes wherever humans go, because it's our home. Instead of giving up Earth again this time, we're taking it with us.

For thousands of years, "homeland" has had an important place in the hearts and

Lu Zikuan is an 11-year-old boy who studies at school in Huixian County, Henan Province. But he has taken up a task to save his father's life in an unexpected way—by eating as much as he possibly can. Maybe many people think the task is simple. But in fact, becoming fat isn't easy in such a short time.

The father is sick and in need of a bone marrow transplant(骨髓移植), and the hospital will only do it if the donor(捐赠者) has a certain weight(45 kilograms). The doctor said that the heavier the weight is, the better it is.

Lu Zikuan is the only one that can match his father's bone marrow in the family. He is now gaining weight as quickly as possible to meet the requirement. Every day, he must eat a lot of food. It makes him always have a stomachache. “Even if it hurts, I'll still eat, ” Lu said. “Our family couldn't bear(承受) the loss of my dad.”

He has ballooned(激增) to 48kg from 30kg since March, when the bone marrow from the boy successfully matched that of his father. His aim is to reach 50kg. And this was his wish on International Children's Day on June 1, 2019.

Once there was a poor lady who lived on a hill near the sea. She lived a lonely life. She was so poor that she had to work hard every day.

But one night as she sat at the table, the lady said to herself, "Why can't I do good to others?" At last, she came up with an idea.

She decided to keep a lighted lamp (灯) at the window for the sailors every night. She found that ships sometimes broke up on the rocks in the sea, since there was no lighthouse to warn them of the danger at night. Maybe her lamp would warn them when their ships came near the rocks on the coast.

The lady felt glad when the thought came through her mind. So she worked late and made money to buy the oil for the lamp and then she placed the lamp at the window each night. In this way she saved many lives.

She did this for five years without the hope of reward (报酬). However, good acts were often found out. The sailors whose lives had been saved began to send gifts to her. They sent her tea from China, cloth from India, silk from France and grapes from Spain. But the poor lady did not need these gifts to make her happy. She gave many of them to the poor and the sick.

She was happy with the thought that she was doing good. So, as long as she lived, she lit her lamp each night, and placed it at the window.

D

On January 27, in order to win the new pneumonia Resistance War (抗击新型冠状病毒肺炎战), the Ministry of Education issued (公布) a notice on putting off the start time of school in spring 2020. It was said that school should not start before February 17. The exact start time of school will depend on situations and further notices.

However, many parents are very worried that putting off the start of school may affect children's studies. If they have such a long winter vacation, children will not learn any knowledge, read books or study at all. They may forget what they have learned before. Staying at home for a long time will make them keep eating, sleeping and playing, which seriously affect their physical and mental health.

In short, the close of school influences learning and develops bad habits, so how should we avoid these problems? Local education departments have also issued a notice, that is, to organize online teaching and create a network platform (平台), where necessary courses will be shown every day, and online teaching will be given by excellent teachers of the subject, and students can learn at home through computer or mobile network.

It should be said that such a method is very good. It can not only keep students indoors and not worry about the infection (感染) of the disease, but also make them study at home, improve their learning ability, and truly achieve "no suspension of classes". Both the platform itself and the recorded lesson resources are more useful, and are welcomed by parents and teachers.

Of course, except for learning at home, it is also necessary to teach children about health knowledge, especially how to keep away from touching virus and other knowledge popularization; at the same time, it is also necessary for children to do some physical exercises or some games, which is good for physical health at home.

78. Parents worried about putting off the start time of school because _____

- A. children may be infected by virus
- B. they don't like the idea of online learning
- C. children's study may be affected
- D. parents have no time to look after children

79. Except for learning at home, what is also necessary according to the writer?

- A. To keep playing online games.
- B. To keep touching different people.
- C. To do some physical exercises outside.
- D. To teach children about health knowledge.

80. The underlined word "suspension" in Paragraph 4 probably means _____.

- A. stop
- B. plan
- C. growth
- D. change

81. Which is TRUE according to the passage?

- A. Students would rather go to school.
- B. The date of going to school is decided.
- C. Online teaching will help students study.
- D. Parents believe children can teach themselves.

82. What's the best title for this passage?

- B. A Special Way to Learn at Home

One day long ago, some fishermen set out to sea in their ship. One of them brought his pet monkey along for the long journey.

When they were far out at sea, a terrible storm broke their ship. Everyone fell into the sea, and the monkey was going to die. Suddenly a dolphin appeared and picked him up.

They soon reached an island and the monkey came down from the dolphin's back. The dolphin asked the monkey, "Do you know this place?" The monkey replied, "Yes, I do. The king on the island is my father, so you must treat me very well."

"That's a lie," the dolphin thought. Because he knew no one lived on the island. The dolphin said, "Well, well, so you are a prince(王子)! Now you can be a king!" The monkey asked, "How can I be a king?"

As the dolphin started swimming away, he answered, "That is easy. As you are the only animal on this island, you will certainly be the king!" In the end, the monkey died on the island alone. Remember that we should be honest in our life.
